The Warnekes

Missionaries to Fiji

Praying Pastor and Church,

July 31, 2018

My time in the States is coming to a close. Praise the Lord Renee has recovered almost completely. I will be heading back to Fiji on August 29th to clean our home and spray everything down for mold. The doctor here does not want her to be back in that environment until the mold is cleaned out of our home. For years the mold had poisoned her system and made her sick, we are so thankful God gave us the answers to help her recover from the poisoning. I will be returning to Fiji before she and the boys to clean the house. Renee and the boys will follow in a couple of weeks afterward.

The past couple of months have been busy with many different things. I have been able to preach a Sunday School class here at my father in-laws church, go soul-winning and help with the building of a new parsonage here at the church. It has kept us all busy doing ministry while my wife has been undergoing treatment. Renee has also been helping in any way she can around the church. We also were able to go to a family camp where I preached one of the sessions every day. We enjoyed our time there hearing Bro. Bill Marshall preach and the fellowship with friends. Our middle son, Micah, decided to enter the preaching competition while we were there and surprised us when he was asked to preach to the whole camp. It was his first time preaching and he did a good job. He won 1st place at the preaching competition and made us very proud. He believes God has called him to preach, and for that we are thankful.

I hear from the men of the church in Fiji that all is going well. The attendance has been a little bit down while I have been away, but the faithful people are continuing to come. It will be good to be back and get things back to normal.

Please continue to pray for Renee as she returns to Fiji. We are hoping to maintain a mold free environment for her to continue to be on the field. It will be a new challenge for us to maintain a mold free home in such a mold filled environment like Fiji. God is so good to place us here in Kalispell. He knew ahead of time, that this was the place that she needed to come for answers. The doctor here knew what it was and had her tested when many other doctors did not know. About 30 minutes from here a man developed a special non-toxic enzyme that dissolves mold, that he ships all over the U.S. Only God could have us in contact with just who we needed. He is always good and shows us that He is with us all the time.

Thank you for faithfully supporting us and all the prayers you have sent for our family!

Josh, Renee, Luke, Micah and Josiah Warneke
